MICHIGAN, East

WASHTENAW (MI-Z075), WAYNE (MI-Z076), MONROE (MI-Z083)

11/24/06 05:00 EST	0	0	Freezing Fog
11/24/06 10:00 EST	0	0	

A high pressure system set up a favorable situation for fog formation. Light winds off of Lake Erie and Lake St Clair carried a marine layer of low clouds and dense fog inland across the Detroit area, mainly along and south of I-94. Visibilities were near zero at times during the rush hour traffic. Temperatures in the 20's allowed the dense fog to freeze on area roadways, creating slippery conditions and numerous accidents. By 1000 EST, temperatures had climbed above freezing and visibilities had begun to improve.
